at the curriculum and modules

1 MODULE

People Analytics Foundations

In the first course, you will learn how People Analytics is used to solve pressing business problems through 5 real-life case studies. Your instructor will use practical examples to show you how you can use data to create more effective people policies and increase HR's strategic impact on the organization. You will also learn the responsibilities of a People Data Analyst and how to succeed in this role.

- **People Analytics Foundations**
 - What Is People Analytics
 - 5 People Analytics Use Cases
 - The People Analytics Cycle
 - The Role of the Data Analyst

4 MODULES

HR Data Analyst

You've mastered the foundations, now it's time to start analyzing data in Excel. In this course, you will get hands-on with people data through a series of practical case studies and assignments. You will learn how to reveal patterns in the data, uncover insights, and effectively visualize and present your findings to compel key decision-makers into action.

4 MODULES

HR Dashboards in Power BI

In this course, you will learn how to transform large amounts of data into intelligent, actionable insights. You will learn to create interactive reports and advanced dashboards in Power BI by working through a practical case, solving people challenges for various stakeholders throughout the business.

Power BI Desktop is a free application that you can install on your Windows computer. Mac users can run Power BI in a browser, but this version has limited functionality. We recommend using a Windows computer for the practical parts of this course.

- **Preparing & Manipulating HR Data**
- **Using VLookups & Data Visualization**
- **Dashboarding in Excel**
- **Interactive Case Study: Employee Turnover**

- **Building a Strong Power BI Foundation**
- **Data-Driven Absence Reporting in Power BI**
- **Turning Data into Actionable Reports**
- **From Insights to Action: Publishing Power BI Reports**

5 MODULES

HR Statistics in Excel

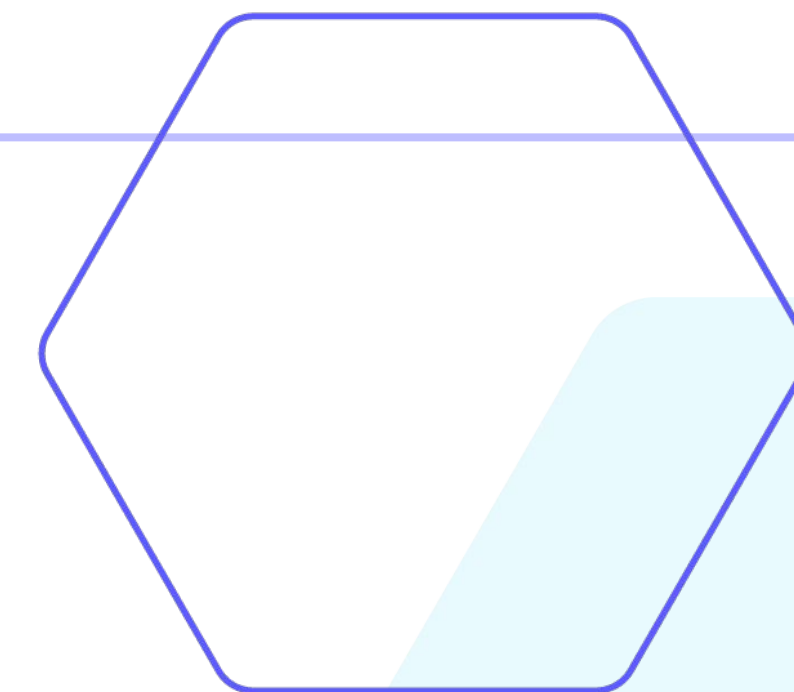

In the final course, you will return to Excel to tackle more advanced data analysis. In order to properly interpret data insights and provide meaningful recommendations, you will need to comprehend some core statistical concepts like significance and probability. Through practical activities, you will learn how to run the statistical analyses you need to make sound decisions even when faced with limited data and uncertainty.

1 MODULE

Capstone Project

In the capstone project, you will put your newly acquired People Analytics expertise into practice. In this interactive project, you will find yourself in the role of an HR analyst asked to answer a series of business questions by performing a descriptive analysis, building a report in Power BI and testing hypotheses.

- **Statistical Analysis 101**
- **Validating Hypotheses: Chi-Square & Z Tests**
- **Comparing Groups: The T-Test**
- **Assessing Variations Between Groups: ANOVA & Tukey's HSD**
- **Correlation Analysis**
